SHARING A COMMON VISION FOR A CIRCULAR ECONOMY

Circular Economy: a system where resources remain resources
There’s no denying it; the last decade has witnessed an explosive growth of deposit return systems (DRS) across the globe. By the end of 2018, when the last version of this report was published, nearly 290 million people worldwide had access to DRSs. Since then, several new programs have been implemented or announced, including Malta (2022), Western Australia (2020), Victoria (2023), Turkey (2023), Tasmania (2022), Portugal (2022), Scotland (2022), Romania (2022), Slovakia (2023), Latvia (2022), Singapore (2022), Jamaica (2021), New Zealand (2022), and England, Wales and Northern Ireland (2023). By the time all of these programs are implemented over the next two to three years, it’s estimated that nearly 500 million people will have access to DRSs for recycling their empty beverage containers, doubling the number of individuals covered from 2005.

In a nutshell, DRS – also referred to as container refund schemes (CRS) (in Australia) or ‘bottle bills’ in the U.S. – is a proven tool to collect high quantities of beverage containers for reuse and high-quality recycling. These systems see customers pay a small deposit when they purchase a can or bottle, which they get back when they return the container to a collection point for recycling.

Contrary to what the beverage industry might want us to believe, DRS has historically enjoyed widespread public support. New laws receive much public fervour, and most respondents to public opinion polls support expansion of existing deposit laws or introduction of new ones. A recent (2020) opinion poll showed that 83% of Austrians want a DRS, and a full 93% agreed that the producers of plastics should contribute to managing plastic waste. A similar poll conducted in August 2020 showed that 96% of people in Romania support the introduction of DRS.

Some DRSs operate nationally (as is the case in Europe), while others operate on a state or provincial level (as is the case in the United States, Canada, Australia, Israel, and Oceania/Caribbean).

Because of the economic incentive to recycle, DRSs typically result in beverage container recycling rates that are two to three times higher than the rates achieved by jurisdictions that rely on curbside recycling programs, particularly if the deposit is set at an effective level.

In addition to higher recycling rates, DRS has shown to result in cost savings for municipalities, as well as avoided greenhouse gas emissions. They are also effective at reducing litter. According to a 2018 study by Australia’s national science agency, CSIRO, “the proportion of containers found in coastal debris surveys in states with [DRS] was approximately 40% lower than in states without [DRS].” DRSs also have a positive impact on job creation, which is particularly relevant today as governments around the world emerge from the acute phase of the health crisis and invest trillions in post-COVID economic recovery efforts.

In June 2019, the Single-Use Plastics Directive (Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment) was published in the Official Journal of the European Union. The Directive stipulates that Member States achieve a 90% collection for recycling target of single-use plastic bottles by 2029 (and an interim target of 77% by 2025). DRS is suggested as a method to achieve this objective. This legislation, combined with commitments by international brands to increase their use of recycled content, means that deposit programs are likely to continue to expand over the next decade, in both Europe and elsewhere. According to Container Recycling Institute (CRI), it’s reasonable to predict worldwide coverage of at least 1 billion people by 2030.

As DRSs become more widespread over the next decade, it’s more important than ever for industry, government agencies and other stakeholders to understand how these programs work. In this context, Reloop Platform is pleased to release the Global Deposit Book 2020: An Overview of Deposit Systems for One-Way Beverage Containers, which provides a comprehensive summary of over 40 deposit systems in place around the world. This edition also includes a new chapter on “upcoming programs” to highlight some of the key features of deposit systems that will be implemented in the near future and for which sufficient information is available.

1 The latest country to announce plans for implementing DRS is Austria; in September 2020, the country’s environment minister announced its plans to impose a deposit on one-way plastic beverage bottles and metal cans. The details of the DRS, including implementation date, are currently being worked out between the ministry and stakeholders involved.
Each deposit market profiled in this review is structured along the following key parameters (where information is available):

- **Legislative Framework**
  (legal basis for the system)

- **Program Scope**
  (beverages and container types included in the system)

- **Deposit and Fees**
  (deposit values and different fees)

- **System Operator**
  (entity responsible for operating the system)

- **Redemption System**
  (beverage container take-back system)

- **System Results**
  (return rates)

- **Money Material Flow**
  (visual flow schematic)

It is worth noting that all systems, with the exception of California (USA) and most Canadian provinces (Saskatchewan, Yukon, New Brunswick, Nova Scotia, Newfoundland, Northwest Territories, Ontario and Prince Edward Island) have barcode-based recording systems. ‘Barcode-based’ means that the containers are recognized by the barcode and the information is recorded. This makes every container traceable and provides a clear picture on what is returned.

In terms of system results, it is important to point out that the way in which program performance is measured or reported on can vary between jurisdictions. While some system operators may report out a ‘collection rate’, others report a ‘recycling rate’ or ‘redemption rate.’ For the purpose of consistency and because it is not possible to know for certain how performance is measured in each jurisdiction, this report uses ‘return rate’ as a catch-all term. It is understood that the return rate represents the amount of beverage container material that is collected (by weight or unit) expressed as a percentage of the amount of beverage container material placed on the market, excluding exports.

Information for this report was obtained from a number of sources, including personal correspondence with DRS operators, annual reports published by DRS operators, internal documents, government reports, and consultancy reports. A full list of references by jurisdiction is provided at the end of this document.

135.1 million have access to DRS
LEGISLATIVE FRAMEWORK

**Mandate:** Ordinance on Packaging and Packaging Waste (88/2015) and Regulation on management of waste packaging (97/2015)

**Enacted:** 2005

**Implemented:** 2006

**Last updated:** 2015 (Comprehensive Amendment Act)

**Authority:** Ministry of Environment

**Targets:** In total, a minimum of 60% of packaging shall be separately collected and recovered, of which at least 55% and up to 80% shall be materially recycled. Material-specific recycling targets are the same as the European targets, and there are no targets specifically applicable to packaging covered by the DRS.

PROGRAM SCOPE

**Material:** Plastic (predominantly PET), metal (aluminum and tinplate), glass

**Beverage type:**
- Containers > 0.2 L (0.05 gal):
  - Alcohol (beer, wine, hard liquor) and non-alcohol beverages including juices, waters, soft drinks.
- Containers < 0.2 L (0.05 gal):
  - Milk drinks

**Excluded:**
- Milk and milk-containing beverages > 0.2 L (0.05 gal)

DEPOSITS AND FEES

**Deposit initiator:** Producer/Importer

**Deposit value:** 0.50 HRK (€ 0.06, USD$ 0.07)

**Unredeemed deposits:** Environmental Protection and Efficiency Fund (FZOEU)

**Handling fees (2020):**
- **Manual collection:** 0.05 HRK (€ 0.01, USD$ 0.01) (25% VAT included)
- **RVM collection:** 0.18 HRK (€ 0.02, USD$ 0.02) (25% VAT included)
SYSTEM OPERATOR

Clearing system:
Centralized

System operator & administrator:
Environmental Protection and Efficiency Fund (FZOEU)

FZOEU, a public authority, is responsible for activities related to management of packaging and packaging waste more generally and the DRS in particular. The responsibilities of FZOEU related to the management of the DRS include returning to the retailers the deposit paid to the customers; paying out handling fees to retailers; collecting data and deposit amounts from the producers; entering into agreements with authorized collectors and agree on the manner of payment of collection and transport costs; entering into agreements with authorized recyclers and agree on the manner of selling collected packaging; and checking and approving compatibility of the packaging to be collected via RVM.

System finance:
Material revenues, unredeemed deposits, producer fees

REDEMPTION SYSTEM

Return-to-Retail:
Retailers ≥ 200 m² are obliged to take back. Retailers whose sales area is less than 200m² may decide to participate in the DRS provided they are approved by FZOEU. Over 90% of collection is done manually.

Material owner:
Environmental Protection and Efficiency Fund (FZOEU)

SYSTEM RESULTS (2019)

LEGISLATIVE FRAMEWORK

Mandate: Statutory Order on Deposits and Collection of Packaging for Beer and Certain Soft Drinks
Enacted: 2000
Implemented: 2002
Last Updated: 2020 (expansion to juices)
Authority: Ministry of Environment
Targets: None

PROGRAM SCOPE

Material: Plastic (predominantly PET), metal (aluminum), glass

Beverage type:
Beer, carbonated drinks (soft drinks with an alcohol content of 0–0.5%), fermented drink products other than wine and alcohol beverages made from fruit (such as cider with an alcohol content < 10%), mixer products (spirits, wine or other fermented products mixed with other beverages such as soft drinks, cider or juice), mineral water, water, lemonade, iced tea, syrup, juice

Excluded:
Milk products and milk-based products, cocoa, wine and spirits, packaging containing >20 L (5.28 gal) as well as plastic containers > 10 L (2.64 gal) containing non-carbonated water, certain types of barrels or casks

DEPOSITS AND FEES

Deposit initiator:
Producer/Importer

Deposit value:
- Metal, glass < 1 L (0.26 gal): 1 DKK (€ 0.13, USD$ 0.15)
- Plastic < 1 L (0.26 gal): 1.5 DKK (€ 0.2, USD$ 0.22)
- Metal, glass, plastic ≥ 1 L (0.26 gal): 3 DKK (€ 0.4, USD$ 0.45)

Unredeemed deposits:
Dansk Retursystem A/S

Handling fees (2020):

Manual collection:
- Metal: 6.2 øre (€ 0.008, USD$ 0.009)
- Plastic < 1 L (0.26 gal): 6.7 øre (€ 0.009, USD$ 0.0097)
- Plastic > 1 L (0.26 gal): 10.4 øre (€ 0.014, USD$ 0.015)
- Glass: 14.8 øre (€ 0.019, USD$ 0.0214)

RVM with compaction:
- Metal: 1.4 øre (€ 0.0019, USD$ 0.0020)
- Plastic < 1 L (0.26 gal): 1.8 øre (€ 0.0019, USD$ 0.0026)
- Plastic > 1 L (0.26 gal): 2.4 øre (€ 0.0032, USD$ 0.0035)
- Glass: 7.1 øre (€ 0.0095, USD$ 0.0103)

Producer producer fees (2020):
- Plastic: € 0.0093 (USD$ 0.01) – € 0.0684 (USD$ 0.072)
- Metal: € 0.0000 (USD$ 0.00) – € 0.0067 (USD$ 0.06)
- Glass: € 0.0536 (USD$ 0.058) – € 0.1986 (USD$ 0.21)
SYSTEM OPERATOR

Clearing system: Centralized  
System operator & administrator: Dansk Retursystem A/S

Founded in 2000, Dansk Retursystem is a private non-profit organization that has been granted the exclusive right to operate the Danish DRS until 2022 (subject for renewal every 6 years), on the conditions laid down in the Statutory Order no. 1129. The company was established by a number of breweries together with the Danish retail trade and is owned by the producers:

Dansk Retursystem Holding (85.62%),
owned by Carlsberg, Royal Unibrew, Tristed Bryghus and Bryggeriet Fuglsang

System finance: Material revenues, unredeemed deposits and administration fees

REDEMPTION SYSTEM

Return-to-Retail: Retailers with RVMs are required to accept all types of one-way packaging with the Danish deposit label. Stores without RVMs that sell beverages are required to accept the same types of packages as the ones they sell regardless of the brand. Ninety-five percent of collection is done through RVMs. In addition to returning containers to retailers, consumers can use a deposit return bank called “Pantstation” – a building designed for the sole purpose of accepting empty containers. Consumers can return a bag of up to 90 eligible bottles or cans (max 15 kg) at a time. The special deposit bags can be purchased at the Pantstation for a refundable deposit of 6 DKK per bag.

Material owner: Dansk Retursystem A/S

SYSTEM RESULTS (2019)

PET 94 %  
Metal 90 %  
Glass 88 %  

Total Return Rate: 92 %

MONEY MATERIAL FLOW

1. Retailer purchases beverages  
2. Retailer pays price + deposit  
3. Retailer returns empty containers  
4. Retailer receives deposit back  
5. Retailer provides deposit data  
6. Processor receives deposit + handling fee  
7. Processor informs importer  
8. Importer informs producer  
9. Producer refunds deposit + producer fee  
10. Producer receives material scrap value
LEGISLATIVE FRAMEWORK

**Mandate:** Packaging Act and Packaging Excise Duty Act
**Enacted:** 2004
**Implemented:** 2005
**Authority:** Ministry of Environment
**Targets:** Regarding general targets for all packaging, at least 60% of the total mass of packaging waste in a calendar year shall be recovered and 55–80% should be recycled. Material-specific targets: 70% recycling for glass; 60% recycling for metal; and 55% recovery, 45% recycling, and 22.5% reprocessing for plastic. A much higher target of 85% applies to PET and one-way glass covered by the DRS. For metal cans subject to the DRS, the recycling target is 50%.

PROGRAM SCOPE

**Material:** Plastics (predominantly PET), metal (predominantly aluminum), one-way glass
**Beverage type:** Containers 100 ml to 3 L (0.02 gal to 0.79 gal): Soft drinks, water, juice, juice concentrates, nectars, beer, cider, perry, low-alcohol (<6% alcohol content) beverages

**Excluded:** Strong alcohol beverages (vodka, wine, etc.), dairy products, glass jars, cartons (i.e. Tetra Pak)

DEPOSITS AND FEES

**Deposit initiator:** Producer/Importer
**Deposit value:** € 0.10 (USD$ 0.11)
**Unredeemed deposits:** Eesti Pandipakend OÜ
**Handling fees (2020):**

- **Manual collection:** PET and Metal: € 0.0115 + VAT
  One-way Glass: € 0.0130 + VAT
- **RVM without compaction (PET and Metal):** € 0.0215 + VAT
- **RVM with compaction (PET and Metal):** € 0.0331 + VAT
- **RVM collection (One-way Glass):** € 0.0250 + VAT

SYSTEM OPERATOR

**Clearing system:** Centralized
**System operator & administrator:** Eesti Pandipakend OÜ
Founded in 2005, Eesti Pandipakend is a state-accredited (by MoE), non-profit organization that was created to organize the activities related to the DRS and the recycling of one-way beverage containers subject to deposit. It is responsible for organizing the recovery of the collected packaging in Estonia; acceptance of returned packaging from retailers; and performance of packaging companies’ obligations under the Packaging Excise Duty Act, including payment on behalf of the packaging company of excise duty on the packaging.

*System finance:* Material revenues, unredeemed deposits, producer fees

**REDEMPTION SYSTEM**

*Return-to-Retail:* Consumers can return containers subject to deposit and marked with deposit symbol to all locations where those are sold or to a collection point situated on retailer servicing ground. It is a requirement for retailers whose sales area is over 200 m² to take back the containers on their premises. If the sales area is between 20 – 199 m², the retailer can apply to its local municipality to be exempt from that obligation. All vendors under 20 m² of sales area are not obligated to take back deposit containers. Collection system is 94% automated / 6% manual. As of 2019, there were a total of 903 collection points, including 717 RVMs. There are also an additional 430 pick-up points at HoReCa locations.

*Material owner:* Eesti Pandipakend OÜ

**MONEY MATERIAL FLOW**
Unredeemed deposits: Suomen Palautuspakkaus Oy (PALPA)

Handling fees (2020):

Manual collection or RVM without compaction:
Plastic and Metal: € 0.01930 (USD$ 0.021)

RVM with compaction:
Plastic: € 0.02850 (USD$ 0.031)
Metal: € 0.02300 (USD$ 0.025)
One-way Glass: € 0.01930 (USD$ 0.021)

Producer fees (2020):
Plastic: € 0.017 (USD$ 0.02) – € 0.116 (USD$ 0.13)
Metal: € 0.005 (USD$ 0.005)
Glass: € 0.09 (USD$ 0.10) – € 0.14 (USD$ 0.15)

SYSTEM OPERATOR

Clearing system: Centralized
System operator & administrator: Suomen Palautuspakkaus Oy (PALPA)

PALPA is a not-for-profit company responsible for managing the DRS. Its responsibilities include the collection, recycling and/or reuse of the packaging covered by the system, and for managing the administration of the deposits, the development of their systems and the communications concerning their operations. The company is owned by retailers (50%) and beverage producers (50%), including Alko Oy, Inex Partners Oy, Kesko Oyj, Oy Hartwall Ab, Olvi Oyj, and Oy Sinebrychoff Ab.
**REDEMPTION SYSTEM**

*Return-to-Retail:* Any retailer selling deposit-bearing beverage containers is obliged to take back the empty containers. The law includes an exemption, whereby small retailers can refuse to accept packaging if the volume is disproportionately high in relation to its size. As of 2016, around 4,000 RVMs were in operation with 5,000 retail collection points for consumers and an additional 9,000 HORECA recycling points. Collection system is 95% automated / 5% manual.

*Material owner:* PALPA

**MONEY MATERIAL FLOW**

[Diagram showing the flow of money and materials in the redemption system]
GERMANY

Population: 82.9 m
Website: www.dpg-pfandsystem.de/index.php/en

LEGISLATIVE FRAMEWORK

Mandate: German Packaging Law (VerpackG) (replaced the Packaging Ordinance)
Enacted: 1991
Implemented: 2003
Authority: Ministry of Environment
Targets: None

PROGRAM SCOPE

Material: Plastic (predominantly PET), metal (aluminum), glass

Beverage type:
Containers 100 ml to 3 L (0.026 gal to 0.79 gal):
Water, beer and mixed drinks containing beer (incl. alcohol-free beer), carbonated/non-carbonated soft drinks, mixed alcohol drinks

Excluded:
Milk products (> 50% milk content), fruit and vegetable juices1, products intended for child/baby consumption, wines, liquors, containers < 0.026 gal and > 0.79 gal), cartons, stand-up pouches

1 At the time of writing, enlarging the scope of the DRS to include juices is under discussion.

DEPOSITS AND FEES

Deposit initiator:
Producer/Importer

Deposit value:
€ 0.25 (USD$ 0.28) (subject to VAT)

Unredeemed deposits:
Producers and retailers (for their private/white labels)

Handling fees:
None

SYSTEM OPERATOR

Clearing system:
Decentralized (There are several clearing service providers including CCR Clearing GmbH, Clearing Solution GmbH, Der Grüne Punkt – Duales System Deutschland GmbH, Intercycle GmbH, Interseroh Pfand-System GmbH, Reconsys Dienstleistungs-gesellschaft mbH, Remondis Recycling GmbH & Co. KG)

System operator:
Industry and retailers (in the case of private labels)

System administrator:
Deutsche Pfandsystem GmbH (DPG)2

2 DPG is more of a standard setting organization than a system administrator. Established in 2005, Deutsche Pfandsystem GmbH (DPG) is a not-for-profit company that was founded to implement and organize the legally prescribed obligation of the DRS for one-way beverage containers. Its responsibilities involve operating a central database for deposit clearing and the management of the marking standards related to the deposit label (DPG security mark and barcode identification number). The company’s shareholders include the German Retail Federation (50%) and the Federation of German Food and Drink Industries (50%).
System finance:
Unredeemed deposits, material revenues, membership fees (every member of the DPG is required to pay a small annual fee which is dependent on the size of its operations)

REDEMPTION SYSTEM

Return-to-Retail:
Retailers and other final distributors of beverage containers subject to the deposit are required to take back one-way beverage containers, but only those of the same type that they sell, regardless of whether the packaging in question was sold by them or by another retailer (i.e. a retailer that only sells PET bottles is not obliged to take back aluminum or glass containers, but must accept all PET bottles regardless of their size or brand). Retailers with a surface area < 200 m² are exempt from this obligation; they only need to take back the packages of the products they are selling, without any cap. Retailers have the option of accepting containers via RVMs or automatically (collection is about 85% automated / 15% manual). There are approximately 135,000 collection locations.

Material owner:
Retailers

MONEY MATERIAL FLOW

Note: In Germany, there is no central organization responsible for collecting and consolidating all sales data, as is the case in centrally run schemes, such as Infinitum in Norway, for example. Rather, there are several CSPs that collect returns data from the retailers, validate them and forward them to another CSP, working on behalf of the beverage industry. Every retailer/chain has a CSP and every producer has a CSP. In some cases, the same CSP is servicing the retailer and the producer/importer at the same time, but often they are different players, in which cases the CSP of the retailer has to forward the invoices, including the datasets, to the CSP of the industry.

DEPOSITS AND FEES

Deposit initiator: Producer/Importer

Deposit value: 16 ISK (€ 0.11, USD$ 0.12)

Unredeemed deposits: Endurvinnslan Hf

Handling fees (2020): 3 ISK (€ 0.02, USD$ 0.02)

SYSTEM OPERATOR

Clearing system: Centralized

System operator & administrator: Endurvinnslan Hf

Endurvinnslan is responsible for managing the collection of all one-way beverage containers, refunding the deposit to the consumer, preparing collected containers for export and selling it for recycling. The company is owned by the state (Ministry of Finance); the state alcohol and tobacco company of Iceland (Vínbúðin), the Icelandic association of local authorities (Samband íslenskra sveitarfélaga), two metal treatment companies (Alkan and Elkam), Icelandic scout association (Bandalag íslenskra skáta), Icelandic association of merchants (Kaupmannasamtök Íslands), and two Icelandic drink companies (Olgerðin and Coca-Cola).

LEGISLATIVE FRAMEWORK

Mandate: Law No. 52/1989 and Regulation 368/2000
Enacted: 1989
Implemented: 1989
Authority: Ministry of Environment
Targets: 90% collection for aluminum cans and PET bottles and 85% for glass

PROGRAM SCOPE

Material: Plastic (predominantly PET), metal (aluminum), glass

Beverage type: All ready-to-drink beverages; wine and liquor

Excluded: Milk and milk products, juice extract

1 The government is currently pushing to remove these exceptions and add these products to the system.
**System Finance:**
Material revenues, unredeemed deposits, producer fees

**Redemption System**

*Return to Depot:*
Consumers can return empty deposit-bearing beverage containers to 60 return facilities operated by Endurvinnslan. There are currently 10 automated locations and it is planned to expand the use of RVMs to other centers in the coming years. The remaining majority of return facilities are not equipped with RVMs so the returned containers must be counted and sorted manually.

*Material Owner:*
Endurvinnslan Hf

**System Results (2019):**

- Aluminum: 88.4%
- Plastic: 87.3%
- Glass: 83.8%

*Total Return Rate: 87.4%*

**Money Material Flow**
**LEGISLATIVE FRAMEWORK**

**Mandate:** The Law on Packaging and Packaging Waste  
**Enacted:** 2014  
**Implemented:** 2016  
**Authority:** Ministry of Environment  
**Targets:** The goal in 2016 was to collect 55% of all one-way containers introduced to the market. This target was increased for the following years: 70% by 2017, 80% by 2018, 85% by 2019, and 90% by 2020. The same targets apply to all containertypes.

**PROGRAM SCOPE**

**Material:** Plastic, metal, one-way glass  
**Beverage type:** Containers > 100 ml (0.026 gal) to < 3 L (0.79 gal): Beer and beer cocktails, cider and other fermented beverages, mixed alcohol and non-alcohol beverages, all types of water, juice and nectars. Fruit wines and wine-product cocktailers are included when sold in plastic and metal packaging.  
**Excluded:** Milk, wine and spirits

**DEPOSITS AND FEES**

**Deposit initiator:** Producer/Importer  
**Deposit value**: € 0.10 (USD$ 0.11)  
**Unredeemed deposits:** Užstato Sistemos Administratorius (USAD)

1 Deposit is VAT-free in Lithuania

**SYSTEM OPERATOR**

**Clearing system:** Centralized  
**System operator & administrator:** Officially there are two system operators, USAD and Užstatas. However, Užstatas has not yet initiated its activities and therefore USAD is de facto the only operator.

USAD is a not-for-profit organization whose founding members include large beverage producers: the Lithuanian Association of Breweries; the Association of Lithuanian Trade Enterprises; and the Lithuanian Natural Mineral Water Manufacturers’ Association. Combined, the founding organizations are responsible for more than 80% of total beverage containers sold in Lithuania. USAD’s main responsibilities include supplying the means of collection to...
retailers; paying out handling fees to retailers; organizing the transportation of collected containers to the counting center; inspecting and preparing packaging for processing; selecting processors for recycling the packaging; acting as the centralized clearinghouse for deposits; and carrying out public information and awareness raising campaigns.

System finance: Material revenues, unredeemed deposits, producer fees

REDEMPTION SYSTEM

Return-to-Retail: Retailers of deposit-bearing beverage containers are required to accept empty containers and return the deposit, regardless of whether they sell the products in identical packaging. The law stipulates that collection shall be organized at the trading venues, or nearby sites that are no further than 150 m away. Retainers with a shop area up to 300 m² (in bigger cities) and up to 60 m² (in smaller cities and rural areas) are exempt from this obligation. All other retailers of beverage containers subject to the deposit are allowed to participate in the system on a voluntarily basis. At the beginning of 2018, there were a total of 2,713 collection points, of which 1,006 used RVMs (900 RVMs were owned by the manufacturer (compensated by USAD) and 106 were owned by the retailers themselves).

Material owner: USAD

MONEY MATERIAL FLOW
THE NETHERLANDS

Population: 17.1 m
Website: www.retourverpakking.nl

LEGISLATIVE FRAMEWORK

| Mandate: | Packaging Management Decree (Besluit Beheer Verpakkingen) and Generally Binding Declaration (Afvalfonds Verpakkingen) |
| Enacted: | 2004 |
| Implemented: | 2005 |
| Last updated: | 2014/2017/2020 |
| Authority: | Ministry of Infrastructure and Water Management |

Targets:
Initially, the Decree on management of packaging and paper and board of 2005 included a collection target of 95% for plastic beverage packaging > 0.5 L and 55% for plastic bottles ≤ 0.5 L. However, this was never enforced and at the end of 2010 the relevant articles were removed from the Decree. The 2014 Decree does not set specific targets for packaging collected through the DRS, however it sets national recycling targets for 2015 for packaging materials as follows: 45% of plastics, 90% of glass, and 85% of metal. The general targets for plastics (not DRS-specific) are increased each year by 1% until 2022, when the targets will be fixed at 52% for plastics.

PROGRAM SCOPE

| Material¹ | Plastic (predominantly PET) |
| Beverage type¹ | Containers ≥ 0.8 L (0.21 gal): Soft drinks, water |
| Excluded: | Medical drinks, wine (and fruit wine), spirits, moderately alcohol beverages, cartons (those intended for beverages and consist of at least 80% paper or paperboard), glass, metal cans, small plastic bottles, containers ≤ 100 ml (0.026 gal), beverage packaging in which the producer or importer can demonstrate on an annual basis < 500,000 units of consumer packagings be made available |

¹ In April 2020, the Dutch State Secretary for Infrastructure and Water Management announced that a DRS for small plastic bottles (< 1 L (0.26 gal)) would come into effect on July 1, 2021, with a minimum deposit value of € 0.15. The Dutch authorities are also working on deposit legislation for beverage cans.

DEPOSITS AND FEES

| Deposit initiator: | Producer/Importer |
| Deposit value: | € 0.25 (USD$ 0.28) |
| Unredeemed deposits: | Producer/Importer |
| Handling fees: | None |
| Producer fees (2020): | € 0.01 plus € 0.02 |
SYSTEM OPERATOR

Clearing system: Centralized

System operator & administrator: Foundation Return Packaging Netherlands (Stichting Retourverpakkingen Nederland) (SRN)

For the majority of deposit-bearing containers, there is one system in which several supermarkets are connected. This is operated by SRN, which is a not-for-profit organization established by the soft drink and mineral water suppliers in cooperation with the food trade. In addition to SRN, Aldi and Lidl have established their own closed-loop systems where deposit bottles (around 110 million) from the SRN system are not accepted. Besides counting and sorting containers, the SRN handles the transfer of deposit and handling fees (VBR – Vergoeding Behandeling extra Retourembalage) between producers and retailers.

System finance: Administration fees

REDEMPTION SYSTEM

Return-to-Retail:
The take-back of empty beverage containers and the refund of the deposit must occur at the same place where containers of the same material are marketed (or in the “immediate vicinity”). Retailers with a surface area < 200 m² are exempt from this obligation as they can limit the take-back to containers of the same type as marketed by the point of sale. Collection system is 89% automated / 11% manual. In 2017, there was a total of 4,200 RVMs across the Netherlands.

LEGISLATIVE FRAMEWORK

Mandate: Regulations relating to the Recycling of Waste
Enacted: 1997
Implemented: 1999
Last Updated: 2018 (deposit increase)
Authority: Norwegian Environment Agency
Target: To be exempt from the environmental tax, the return rate for cans and plastic bottles must be 95%.

PROGRAM SCOPE

Material: Plastic (predominantly PET, HDPE), metal (aluminum/tinplate)
Beverage type: All (the regulation does not regulate the type of beverage product covered by DRS)

Excluded: Glass

DEPOSITS AND FEES

Deposit initiator:
Producer/Importer

Deposit value:
Plastic, metal ≤ 0.5 L (0.13 gal): 2 NOK (€ 0.16, USD$ 0.18)
Plastic, metal > 0.5 L (0.13 gal): 3 NOK (€ 0.25, USD$ 0.26)

Unredeemed deposits:
Infinitum

Handling fees (2020):
RVM with compaction:
Plastic: 0.25 NOK
Metal: 0.20 NOK

Manual or RVM without compaction:
Plastic: 0.10 NOK
Metal: 0.05 NOK

Producer fees (2020):
Aluminum: 0.00 NOK (€ 0.00, USD$ 0.00)
Steel: 0.21 NOK (€ 0.02, USD$ 0.08)
PET: 0.18 NOK (€ 0.02, USD$ 0.02)
HDPE: 0.18 NOK (€ 0.02, USD$ 0.02)

In addition to the producer fees, above, producers wanting to join the Infinitum system are required to pay a one-time registration fee for the company and a fee for each new packaged product placed on the market.
SYSTEM OPERATOR

Clearing system: Centralized
System operator & administrator: Infinitum

System finance:
Material revenues, unredeemed deposits, producer fees

Established in 1996 under the name Norsk Resirk, Infinitum began operations in 1999 and is owned by the beverage producers and Norwegian grocery producers. Infinitum’s ownership is divided as follows:

- Virke Kiosk og Bensin (1.5%)
- Daglivareleverandørens Servicekontor (7.5%)
- NHO Mat og Drikke (7.5%)
- COOP Norge AS (15.0%)
- Dagligvarehandelens Miljøforum AS (33.5%)
- Bryggeri- og Drikkevareforeningens Servicekontor AS (35%)

REDEMPTION SYSTEM

Return-to-Retail:
All retailers selling deposit-bearing beverages are required to take-back empty containers. Retailers must register with Infinitum but can decide how to organize the collection on their premises – either with a RVM or through manual collection. There are approximately 3,700 RVM collection points in Norway (97% of the total collection) and 12,000 manual collection points (3% of total collection).

Material owner:
Infinitum

- Plastic > 1 L (0.26 gal): 0.52 SEK (€ 0.047, USD$ 0.050)

Producers also have to pay an affiliation fee of 10,000 SEK (which goes directly to the Swedish Board of Agriculture), as well as sorting fees for each packaging marked with a company’s barcode.

PROGRAM SCOPE

Material:
Plastic (predominantly PET), metal (aluminum/tinplate)

Beverage type:
All ready-to-drink beverages including beer, soft drinks, cider, bottled water

Excluded:
Drinks that contain ≥ 50% dairy products, vegetable/fruit/berry juice (since 2018, juice manufacturers can voluntarily join the Returpack system)

1 Note: The historical two laws governing aluminum can and PET bottle recycling had narrower definitions: drink packaging made of aluminum, and bottles that are made of polyethylene terephthalate. The definition in the new law (Ordinance 2005:220) that replaced the existing laws have broader definitions (packaging made of ‘metal’ and ‘primarily of polymer material’).
SYSTEM OPERATOR

Clearing system: Centralized
System operator & administrator: AB Svenska Returpack (Pantamera)

Returpack was established in 1982 to operate the DRS for aluminium cans which began in 1984. When a similar requirement for PET bottles was introduced, Returpack integrated these containers in the already existing system. Returpack is a privately-owned, not-for-profit company and is the only existing deposit system operator approved by the Swedish government. Its owners include representatives from the brewery sectors (50%) and retailer associations equally shared between small (25%) and large (25%) retailers.

System finance:
Material revenues, unredeemed deposits, administration fees

REDEMPTION SYSTEM

Return-to-Retail:
There is no legal obligation for retailers to take-back empty beverage containers; joining the system is voluntary. There are 14,000 collection points (including supermarkets, small cafes, restaurants, airports, etc.) and 95% of returns take place at food retail markets. In addition to returning empty containers to retailers, consumers can use a deposit return bank (Pantamera Express) to take back their bottles and cans. In 2018, there were 30 such machines. Returpack also uses a mobile collection station (Pant-o-Bil) to facilitate the return of beverage containers at festivals. The collection system is 96% automated/4% manual.

Material owner:
AB Svenska Returpack (Pantamera)

SYSTEM RESULTS (2019)

PET  84.1%
Metal  85.8%

Total Return Rate: 84.9%

LEGISLATIVE FRAMEWORK

Mandate: California Beverage Container Recycling and Litter Reduction Act
Enacted: 1986
Implemented: 1987, 2000
Last updated: 2012 (Enforcement & Payments)
Authority: CalRecycle (government operated)
Targets: 80% collection rate (includes containers collected at curbside and redeemed via MRFs)

PROGRAM SCOPE

Material: Plastic, metal (aluminum, bimetal), glass

Beverage type: Beer and malt beverages, wine coolers, distilled spirit coolers, all non-alcohol beverages (carbonated and non-carbonated fruit drinks/water/soft drinks, coffee and tea beverages, 100% fruit juice ≤ 46 oz., vegetable juice ≤ 16 oz.)

Excluded: Milk, infant formula, wine, spirits, 100% fruit juice ≥ 46 oz., 100% vegetable juice > 16 oz.

DEPOSITS AND FEES

Deposit initiator: Producer/Distributor/Importer

California Refund Value (CRV)¹:
Containers < 24 oz (0.19 gal): USD $0.05
Containers ≥ 24 oz (0.19 gal): USD $0.10

Unredeemed deposits:
CalRecycle (placed into Beverage Container Recycling Fund)

¹ If the product purchased is subject to sales tax, then the CRV applied to that product is subject to sales tax

Handling fees (2020):
USD $0.00934 (Paid to Convenience Zone Recycling Centers)

Processing fees (2020):
USD $0.00066 to USD $0.13610 (Paid by beverage manufacturers to CalRecycle)

Processing payments (as of July 2020):
USD $0.07662/lb to $1.06438/lb (Paid by CalRecycle to all recycling centers when the cost of recycling exceeds the value of material)

² Other than Iowa, California is the only U.S. state that includes curbside collection in the “recycling rate” (all of the other states report a “redemption” rate), therefore the left rates include CRV containers collected through curbside collection and drop-off programs in addition to certified recycling centers. If these containers are excluded from the calculation, the estimated “redemption” rates for CRV containers are as right.

MONEY MATERIAL FLOW

1 Note: The State of Iowa does not collect sales or returns data on deposit containers. Material-specific redemption rates were calculated by the Container Recycling Institute (CRI) and the DNR while analyzing “Final 2017 Iowa Statewide Waste Characterization Study,” SCS Engineers for Iowa DNR, 12/28/17. The rates shown reflect deductions made for deposit containers recycled through curbside and dropoff programs, using curbside and dropoff percentages from California (2012 and 2016) as proxies. In other words, the rates shown above exclude CRV containers recycled through curbside and dropoff programs.
LEGISLATIVE FRAMEWORK

Mandate: Maine Returnable Beverage Container Law
Enacted: 1976
Implemented: 1978, 1990
Last updated: 2017
Authority: Maine Department of Environmental Protection
Targets: None

PROGRAM SCOPE

Material: Glass, plastic, metal

Beverage type: Containers ≤ 4 L (1.06 gal): Beer, ale or other drink produced by fermenting malt, spirits (including 50 ml (0.01 gal) liquor known as ‘nips’), wine, hard cider, wine coolers, soda, non-carbonated water, non-alcohol carbonated or non-carbonated drinks in liquid form and intended for human consumption

Excluded: Unflavoured milk and milk substitutes, certain containers composed of a combination of aluminum and plastic/paper filled with non-alcohol beverages, Maine-produced juices and cider, infant formula, nutritional supplements, products frozen at sale or intended for consumption in a frozen state, paper or cardboard containers

DEPOSITS AND FEES

DEPOSITS AND FEES

Deposit initiator:
Producer/Distributor/Importer

Deposit value:

- Non-alcohol ≤ 1 L (0.26 gal): CAD$ 0.10 (USD$ 0.07)
  (up from CAD$ 0.05 (USD$ 0.04)
as of November 1, 2019)
- Non-alcohol > 1 L (0.26 gal):
- Wine & spirit ≤ 1 L (0.26 gal):
- Wine & spirit > 1 L (0.26 gal):
- Beer bottles ≤ 1 L (0.26 gal):

Unredeemed deposits:
Encorp Pacific (Canada) and Brewers Distributors Limited (BDL)

Handling fees:
Confidential - Bottle depots independently negotiate HFs directly with the beer industry. HFs fluctuate depending on the cost to collect and process each type of container.

Container recycling fees (2020):
CAD$ 0.00 to CAD$ 0.17 (USD$ 0.13) (calculated on an annual basis and based on net cost of collection and recycling of specific containers)

1 Note: In June 2020, the B.C. government amended its Recycling Regulation. As part of this amendment, the previous section obligating a deposit of CAD 0.20 on larger containers (> 1 L) was struck, allowing Encorp Pacific to harmonize the deposits on all beverage containers. In response, on July 6, 2020, Encorp Pacific announced that starting October 1, 2020, it will implement a CAD 0.10 unified deposit for all beverage containers, regardless of size.
**SYSTEM OPERATOR**

*Clearing system:* Centralized

*System operator & administrator:* Encorp Pacific (Canada) and BDL

Encorp Pacific represents brand owners of non-alcohol beverages, wine, spirits, some ciders, and coolers, as well as some import beer manufacturers. BDL represents brand owners of domestic coolers, beers, and ciders, and it collects the containers of both these domestic distributors and of outside distributors who import.

*System finance:* Material revenues, unredeemed deposits, container recycling fees

**REDEMPTION SYSTEM**

*Return-to-Retail/Return-to-Depot:* Total of over 1,315 return locations

**Encorp Pacific** *(non-alcohol, wine, spirits, cider, and imported beer):* 170 independent depots and hundreds of retail outlets

**Brewers Distributor Ltd.** *(domestic beer, coolers and cider):* Provides for retail returns at a total of 1,145 locations including 73 BDL authorized depots, 649 licensee retail stores, 200 government liquor stores, and 223 rural agency locations.

NEW BRUNSWICK

Population: 0.8 m
Website: www2.gnb.ca/content/gnb/en/services/services_renderer.3975.Beverage_Container_Program.html

LEGISLATIVE FRAMEWORK

**Mandate:** General Regulation – Beverage Containers, made under the Beverage Container Act
**Enacted:** 1991
**Implemented:** 1992
**Authority:** Department of Environment
**Targets:** No legislated targets, however the Department of Environment has established an unofficial target recovery rate of 80% by year five (1997) of the program

PROGRAM SCOPE

**Material:** Plastic, metal (aluminum and other), one-way glass, gable top, Tetra Pak

**Beverage type:**
- **Containers ≤ 5 L (1.32 gal):** Water, flavoured waters, fruit juices, vegetable juices, soft drinks, beverages with dairy (e.g. milk shakes, coffee drinks), unfortified plant-based beverages (e.g. almond, rice), fortified plant-based beverages not a source of protein, sports drinks, beer, wine, spirits, low-alcohol drinks

**Excluded:** Milk, fortified plant-based beverages considered a source of protein, meal replacements, formulated liquid diets, infant formula, powdered or frozen juices, concentrates, fruit syrups

DEPOSITS (HALF BACK) AND FEES

**Deposit initiator:** Producer/Distributor/Importer

**Deposit/refund value:**
- **Non-alcohol:** CAD $0.10 / USD $0.07
- **Alcohol ≤ 500 ml (0.13 gal):** CAD $0.10 / USD $0.07
- **Alcohol > 500 ml (0.13 gal):** CAD $0.20 / USD $0.15

**Unredeemed deposits:**
- Encorp Atlantic and New Brunswick Liquor (Alcool NB Liquor)

1 Under New Brunswick’s half-back system, consumers receive only half of their deposit back when they return non-refillable containers. Fifty-percent of this “half-back” revenue (2.5- or 5-cents depending on container size), plus the revenue generated from unredeemed deposits and from the sale of material, is used to pay for program costs. The remaining 50% of the “half-back” revenue goes into the province’s Environmental Trust Fund where it is used for environmental conservation, education, protection, and other provincial environmental initiatives aimed at reducing waste.

**Handling fees (2018):**
- CAD $0.0406 (USD $0.03)
SYSTEM OPERATOR

MONEY MATERIAL FLOW

[Diagram of the redemption system flowchart, showing interactions between retailer, distributor, depot, and processor.]
DEPOSITS AND FEES

Deposit initiator: Producer/Distributor/Importer

Deposit value: CAD$ 0.10 to CAD$ 0.25 (USD$ 0.07 to USD$ 0.18)

Unredeemed deposits: Department of Environment and Natural Resources

Container recycling fees: CAD$ 0.05 to CAD$ 0.13 (USD$ 0.04 to $ 0.10)

Handling fees (2018): CAD$ 0.022 to CAD$ 0.045 (USD$ 0.016 to USD$ 0.033)

Processing fees (2018): CAD$ 0.02 to CAD$ 0.045 (USD$ 0.015 to USD$ 0.033)

At the point of purchase, the customer is charged a refundable deposit and a non-refundable container recycling fee. Container recycling fees vary by type of container and container size, and are based on the estimated costs to collect, process, and transport beverage containers and to administer the program. These fees, along with unredeemed deposits and material revenues, are used to pay for the program.

PROGRAM SCOPE

Material: Plastic, metal (aluminum, bimetal), one-way glass, Tetra Pak, drink pouch, bag-in-a box, carton

Beverage type: All ready-to-serve drinks including non-alcohol beverages (including liquid milk products), wine, spirits, and non-refillable beer

Excluded: Infant formula, liquid milk products < 30 ml (0.007 gal), powdered milk, open containers filled with a drink when sold

LEGISLATIVE FRAMEWORK

Mandate: Beverage Container Regulations, made under the Waste Reduction and Recovery Act

Enacted: 2003

Implemented: 2005

Last updated: 2010

Authority: Northwest Territories Department of Environment and Natural Resources (ENR)

LEGISLATIVE FRAMEWORK

Mandate: Solid Waste – Resource Management Regulations
Enacted: 1994
Implemented: 1996
Last updated: 2007
Authority: Department of Environment
Targets: None

PROGRAM SCOPE

Material:
Plastic, metal (aluminum, bimetal), one-way glass, gable top, Tetra Pak

Beverage type:
Containers < 5 L (1.32 gal):
All ready-to-serve drinks including non-alcohol beverages, wine, spirits, and one-way beer

Excluded:
Fluid milk and milk products, soya milk, rice beverages, certain meal replacements, formulated liquid diets, foods for low energy diets, thickened juices, baby formulas, concentrates, non-alcohol beverages ≥ 5 L (1.32 gal)
RRFB Inc. (operating as Divert NS) was incorporated in 1996 to administer major components of the Nova Scotia Solid Waste-Resource Management Strategy (1995). Divert NS is tasked with five mandates, one of which is to develop and operate a DRS for beverage containers. Distributors of designated beverage containers are required to register with Divert NS in order to sell or distribute these products legally within the province. They must also report sales data and remit applicable deposits directly to Divert NS on a monthly basis.

Divert NS is not responsible for administering the domestic beer bottle deposit program. Deposits are provided by the Brewers Association. Under their program, the deposit for refillable domestic beer bottles is fully refundable ($1.20/dozen).

System finance:
Material revenues, half-back, unredeemed deposits

RRFB
ONTARIO

Population: 14.7 m
Website: www.bagitback.ca

LEGISLATIVE FRAMEWORK

Mandate: Ontario Regulation 13/07
(Onario Deposit Return Program), made under the Liquor Control Act
Enacted: 2006
Implemented: 2007
Authority: Liquor Control Board Ontario (LCBO)
Targets: Ontario’s Strategy for a Waste-Free Ontario: Building the Circular Economy indicates that the province will establish requirements that producers must meet, including reuse and recycling targets. What these targets will be and how they will be set (e.g., material-specific, specific to the DRS, or specific to the residential curbside recycling program) will be set out in future regulations.

PROGRAM SCOPE

Material: Plastic, metal (aluminum, bimetal), one-way glass, gable top, Tetra Pak, bag-in-a-box

Beverage type: Wine, spirits, beer

Excluded: Non-alcohol beverages, containers ≤ 100 ml (0.03 gal), containers purchased at duty-free stores

DEPOSITS AND FEES

Deposit initiator: Producer/Distributor/Importer

Deposit value:
- Wine and spirits ≤ 630 ml (0.17 gal): CAD$ 0.10 (USD$ 0.07)
- Wine and spirits > 630 ml (0.17 gal): CAD$ 0.20 (USD$ 0.15)
- Beer cans and bottles ≤ 1 L (0.26 gal): CAD$ 0.10 (USD$ 0.07)
- Beer cans and bottles > 1 L (0.26 gal): CAD$ 0.20 (USD$ 0.15)

Unredeemed deposits:
Beer distributor/bottlers and the Liquor Control Board of Ontario (LCBO)

Handling fees:
Proprietary (paid by brewers to The Beer Store)

The LCBO is obligated to reimburse The Beer Store (TBS) for all deposit refunds that TBS pays out to consumers who return wine, spirit, and imported beer containers that are not sold at TBS; it is also required to pay TBS a per unit service fee for these containers. A contract with TBS, in effect since September 2015, sets the fee at 10.81-cents for 2018.
SYSTEM OPERATOR

Clearing system:
Centralized

System operator & administrator:
TBS

System finance:
Material revenues, unredeemed deposits, per unit service fee from LCBO for wine spirits and any imported beer or cider sold exclusively at LCBO stores.

REDEMPTION SYSTEM

Return-to-Retail:
1,165 redemption locations, including 435 TBS locations, 320 on-site brewery stores (beer containers only), 327 retail partner stores and LCBO northern agency stores, 3 LCBO stores, and 80 TBS-contracted empty bottle dealers

Material owner:
TBS

1. Distributor pays price + deposit to retailer.
2. Retailer purchases beverages.
3. Retailer receives empty containers.
4. Retailer returns 1/2 deposit back to processor.
5. Processor reimburses 1/2 deposit + handling fee.
6. Processor keeps material scrap value.
7. Processor returns data.
DEPOSITS AND FEES

Deposit initiator:
Producer/Distributor/Importer

Deposit value:
Soft drink containers and beer cans
≤ 450 ml (0.12 gal): CAD$ 0.05 (USD$ 0.04)
Beer cans > 450 ml (0.12 gal): CAD$ 0.20 (USD$ 0.15)
One-way glass < 450 ml (0.12 gal): CAD$ 0.10 (USD$ 0.07)

Unredeemed deposits:
For unredeemded deposits on soft drink containers, BGE gives $ 250K/year to Recyc-Québec to cover their operational costs. The rest stays with BGE. For one-way beer containers, Recyc-Québec keeps 33% and gives the rest (66%) back to the brewers association (L’association des brasseurs du Québec).

Handling fees (2020):
Soft drink containers & beer cans: CAD$ 0.02 (USD$ 0.015)
One-way glass beer bottles: CAD$ 0.01 (USD$ 0.007)

LEGISLATIVE FRAMEWORK

Mandate:
Environment Quality Act and the Agreement Relating to the Consignment, Recovery & Recycling of Non-Refillable (Soft Drink/Beer) Containers

Enacted: 1984
Implemented: 1984
Last updated: 2014
Authority: Recyc-Québec
Targets:
75% collection target for soft drinks and 75% collection target for beer. By 2025, 75% of containers must be recycled and reused, increasing to 90% by 2030.

PROGRAM SCOPE

Material:
Plastic, metal (aluminum, bimetal), one-way glass

Beverage type:
Beer and carbonated soft drinks (all beverages that contain water with essence of flavour)

Excluded:
Energy drinks, water, juice, wine, spirits, milk

1 By Fall 2022, wine will have a deposit of CAD$ 0.25 (USD$ 0.18) deposit and spirits will have a deposit of CAD$ 0.10 (USD$ 0.07).
SYSTEM OPERATOR

Clearing system:

LEGISLATIVE FRAMEWORK

**Mandate:** Waste Management and Resource Recovery Amendment Act and the Waste Management and Resource Recovery (Container Deposit Scheme) Amendment Regulation (No 1)

**Enacted:** 2017

**Implemented:** 2018

**Authority:** ACT Government

(Transport Canberra and City Services)

**Targets:** None

DEPOSITS AND FEES

**Deposit initiator:** Producer/Distributor/Importer

**Refund value:**

AUD$ 0.10 (€ 0.07, USD$ 0.08)

**Unredeemed deposits:** Not applicable (In Australia, there is no legislation saying a ‘deposit’ must be paid, just that a refund must be given to all consumers that recycle at a refund point. As a result, there is no pool of unredeemed deposits. Instead, the system operator invoices producers a ‘producer fee’. This fee is based on the number of containers that are returned and also depends on the revenues earned from the sale of material).

**Handling fees (2020):**

AUD$ 0.08 – $ 0.09

(estimate, as this is confidential)

**Producer fees:**

Producer costs per container for the first three months of operation, including the AUD$ 0.10 deposit, based on an expected overall recovery of between 70 – 72%, are AUD$ 0.0994, AUD$ 0.10192 and AUD$ 0.10455

PROGRAM SCOPE

**Material:** Metal (aluminum/steel), glass, plastic (HDPE, PET), liquid paperboard

**Beverage type:**

Containers 150 ml to 3 L (0.04 gal to 0.79 gal):

All beverages

**Excluded:**

Wine, spirits, cordial and plain milk (or milk substitute) containers, flavored milk containers of ≥ 1 L (0.26 gal), pure fruit or vegetable juice containers of ≥ 1 L (0.26 gal), glass containers for wine and spirits, casks for wine or water ≥ 1 L (0.26 gal), sachets for wine of ≥ 250 ml (0.07 gal), containers for cordials and concentrated fruit/vegetable juices registered health tonics

AUSTRALIAN CAPITAL TERRITORY (ACT)

Population: 0.4 m

Website: www.actcds.com.au
SYSTEM OPERATOR

Clearing system:
Centralized

System operator & administrator:
Exchange for Change is the system coordinator, responsible for financial management and ensuring that the scheme meets its statewide access and recovery targets. The network operator is Re.Turn It, which sets up and runs the collection points, including utilizing their existing MRF as a consolidation and processing center.

System finance:
Producer fees, material revenues

REDEMPTION SYSTEM

There is no retail obligation to participate in the scheme.

Return to Depot/Redemption Center:
21 drop-off points including 3 bulk depots, 9 express points at Vin-nies, Salvos, and Anglicare stores, express points at Evatt and Farrer IGAs and ACT Basketball, and 6 express pods. Collection is mostly manual. Curbside redemption is also possible.

Material owner:
Re.Turn It (network operator)

1 Note: In Australia, unlike most other DRSs, there is no legislated requirement to place a deposit amount on every container sold. However, there is a legislated requirement to provide consumers that return their containers with a refund. This means the prices paid by retailers to producers, for instance, will not be the ‘price + deposit’, it’s just the price – this price may then include the value of the deposit and whatever additional costs the producers want to pass on to the retailers. In the same way, producers do not pay the ‘deposit’ against 100% of sales, but the producer fee paid to Exchange for Change effectively includes the value of the deposit + system costs (including handling fees) – material sales revenues,

Producer/Distributor/Importer

Refund value:
AUD$ 0.10 (€ 0.07, USD$ 0.08)

Unredeemed deposits:
Not applicable (In Australia, there is no legislation saying a ‘deposit’ must be paid, just that a refund must be given to all consumers that recycle at a refund point. As a result, there is no pool of unredeemed deposits. Instead, the system operator invoices producers a ‘producer fee’. This fee is based on the number of containers that are returned and also depends on the revenues earned from the sale of material).

Handling fees:
Not available (negotiated and proprietary)

SYSTEM OPERATOR

Clearing system:
Decentralized (Multiple CDS coordinators)

System operator & administrator:
Beverage industry and private operators

System finance:
Producer fees, material revenues

PROGRAM SCOPE

Material:
Glass, aluminum, plastic (HDPE, PET), liquid paperboard

Beverage type:
Containers < 1 L (0.26 gal):
Flavoured milk, pure fruit/vegetable juice, water in aseptic packs/casks, some wine-based beverages

Containers ≤ 3 L (0.79 gal):
Carbonated soft drinks, non-carbonated soft drinks (including but not limited to: fruit/ juice based drinks containing < 90% juice, sports drinks, vitamin drinks, energy drinks, ready-to-drink cordials), water that is not in an aseptic pack/cask, beer/ales/stouts/cider, spirit-based beverages, some wine-based beverages

Excluded:
Unflavored milk, soy milk, cordial bottles (undiluted), concentrated fruit and/or vegetable juice intended to be diluted before consumption, still or sparkling wine (in glass)
REDEMPTION SYSTEM

There is no retail obligation to participate in the scheme.

Return to Depot:
14 permanent collection depots and 10 temporary/mobile sites.

Material owner:
CDS coordinators

CDS coordinators coordinate the activities of those involved in the deposit return scheme and have arrangements with depots across the Territory. They coordinate the return of empty containers from collection depots, reimburse depots for refunds paid to consumers, and pay depots a handling fee, sell the containers to material recyclers and processors for recycling, reuse or recovery of energy. CDS coordinators, in turn, claim the deposit and handling fee from the beverage filler. As of 2019, four CDS coordinators are approved to operate under the CDS: Envirobank NT Pty Ltd.; Marine Stores Pty Ltd.; NT Coordinators Pty Ltd.; and Can-Recycling (SA) Pty Ltd. trading as Statewide Recycling.

MONEY MATERIAL FLOW

[Diagram of the redemption system flow]
DEPOSITS AND FEES

Deposit initiator:
Producer/Distributor/Importer

Refund value:
AUD$ 0.10 (€ 0.07, USD$ 0.08)

Unredeemed deposits:
Not applicable (In Australia, there is no legislation saying a ‘deposit’ must be paid, just that a refund must be given to all consumers that recycle at a refund point. As a result, there is no pool of unredeemed deposits. Instead, the system operator invoices producers a ‘producer fee’. This fee is based on the number of containers that are returned and also depends on the revenues earned from the sale of material).

Handling fees (2020):
Approximately AUD$ 0.06 – AUD$ 0.065 is paid to collection points. The scheme coordinator manages and pays separate fees for logistics and processing services (approximately AUD$ 0.09, including collection, transport, processing).

Producer fees (2019):
Average of AUD$ 0.102

LEGISLATIVE FRAMEWORK

Mandate: Waste Reduction and Recycling (Container Refund Scheme) Amendment Regulation

Enacted: 2017

Implemented: 2018

Authority: Queensland Government (Environment Minister)

Targets: 85% return rate by 2021/2022

PROGRAM SCOPE

Material:
Plastics (PET, HDPE, other), glass, metal (aluminum/steel), liquid paperboard

Beverage type:
Containers 150 ml to 3 L (0.04 gal to 0.79 gal):
All beverages (non-alcohol, alcohol)

Excluded:
Plain milk containers, glass containers which have contained wine or pure spirits, large containers (>1 L or 0.26 gal) which have contained flavoured milk/pure juice/cask wine/cask water, cordial or vegetable juice, sachets > 250 ml (0.07 gal) (which have contained wine, registered health tonics

SYSTEM OPERATOR

Clearing system:
Centralized

System operator & administrator:
Container Exchange (CoEx)

System finance:
Producer fees, material revenues

REDEMPTION SYSTEM

There is no retail obligation to participate in the scheme.

Return to Depot:
There is a mix of collection types that include depots (10 of which are automated with RVMs), staffed over-the-counter depots, bag drops, and pop-up collection points. The mix is approximately 42% drop-offs, 35% depots, and 23% RVM/mobile. Community organizations can also provide donation points where refund are not paid to consumers but to those organizations as a donation. These points are not included in the number of refunds points above.

Material owner:
Container Exchange (CoEx)

1 Note: In Australia, unlike most other DRSs, there is no legislated requirement to place a deposit amount on every container sold. However, there is a legislated requirement to provide consumers that return their containers with a refund. This means the prices paid by retailers to producers, for instance, will not be the ‘price + deposit’. It’s just the price – this price may then include the value of the deposit and whatever additional costs the producers want to pass on to the retailers. In the same way, producers do not pay the ‘deposit’ against 100% of sales, but the producer fee paid to CoEx effectively includes the value of the deposit + system costs (including handling fees) – material sales revenues.

SYSTEM RESULTS (2019–20)

Total Return Rate: 58%
Includes returns through DRS network as well as curbside bins.

MONEY MATERIAL FLOW
DEPOSITS AND FEES

Deposit initiator:
Producer/Distributor/Importer

Refund value:
AUD$ 0.10 (€ 0.07, USD$ 0.08)

Unredeemed deposits:
Not applicable (In Australia, there is no legislation saying a ‘deposit’ must be paid, just that a refund must be given to all consumers that recycle at a refund point. As a result, there is no pool of unredeemed deposits. Instead, the system operator invoices producers a ‘producer fee’. This fee is based on the number of containers that are returned and also depends on the revenues earned from the sale of material).

Handling fees (2020):
Approximately AUD$ 0.1109 (varies by material type)

SYSTEM OPERATOR

Clearing system:
Decentralized (three ‘Super Collectors’ operated by separate producer consortiums)

System operator & administrator:
Beverage industry and consortium of collection depots

System finance:
Producer fees, material revenues

LEGISLATIVE FRAMEWORK

Mandate: Beverage Container Act
Enacted: 1975
Implemented: 1977
Authority: Environmental Protection Authority
Targets: None

PROGRAM SCOPE

Material:
Glass, aluminum, plastic (HDPE, PET), liquid paperboard

Beverage type:

Containers < 1 L (0.26 gal):
Water in aseptic packs/casks, pure fruit/vegetable juice (containing ≥ 90% fruit juice and/or vegetable juice), flavoured milk, wine in aseptic packs/casks, flavoured alcohol beverages with a wine base in aseptic packs/casks

Containers ≤ 3 L (0.79 gal):
Carbonated and non-carbonated soft drinks, water (plain, still or carbonated), beers/ales/stout, wine based beverages (wine cooler and similar beverages), spirit-based beverages, alcohol beverages (derived from the fermentation of fruit)

Excluded:
Wine in glass bottles, plain or unflavoured milk, concentrated fruit and/or vegetable juice intended to be diluted before consumption, cordial (undiluted)
REDEMPTION SYSTEM

There is no retail obligation to participate in the scheme.

Return to Depot:
132 licensed largely manual depots. Empty containers are sorted and prepared at the collection depots across the state for collection by the ‘super collectors’, which act as agents for the beverage industry. Only two super collectors operate facilities to physically handle and process the containers that are returned to depots for a refund. A super collector coordinates the return of empty containers from depots, reimburse depots for refunds paid to consumers, and pay depots a handling fee. They also sell and deliver the empty containers to material recyclers for recycling, reuse or energy recovery.

Material owner:
System operator

Note: In Australia, unlike most other DRSs, there is no legislated requirement to place a deposit amount on every container sold. However, there is a legislated requirement to provide consumers that return their containers with a refund. This means the prices paid by retailers to producers, for instance, will not be the ‘price’ + ‘deposit’, it’s just the price – this price may then include the value of the deposit and whatever additional costs the producers want to pass on to the retailers. In the same way, producers do not pay the ‘deposit’ against 100% of sales, but the producer fee paid to Super Collectors effectively includes the value of the deposit + system costs (including handling fees) – material sales revenues.

LEGISLATIVE FRAMEWORK

Mandate: Deposit on Beverage Containers Law
Enacted: 1999
Implemented: 2001
Last updated: 2010
Authority: Ministry of Environment
Targets: 77% collection rate

PROGRAM SCOPE

Material: PET, metal, glass
Beverage type: Containers > 100 ml (0.026 gal) and < 1.5 L (0.4 gal)¹:
  All beverages

Excluded: Dairy products

¹ In October 2020, Israel’s Environment Minister announced that the DRS will be extended to large plastic bottles of between 1.5 and 5L (1.6 to 5.3 quarts). Drinks companies and retailers involved will be given a year to prepare for the changes even though the law only provides for 60 days.

DEPOSITS AND FEES

Deposit initiator: Producer/Distributor/Importer
Deposit value: 0.3 ILS (€ 0.07, USD$ 0.08)
Unredeemed deposits: ELA Recycling Corporation and Asofta Recycling Corporation
Handling fees (2020): 0.05 ILS (Paid by ELA to retailers only) (€ 0.013, USD$ 0.014)

SYSTEM OPERATOR

Clearing system: Centralized
System operator & administrator: ELA Recycling Corporation and Asofta Recycling Corporation

The Deposit Law imposes the responsibility for collecting and recycling directly on the beverage manufacturers/importers so they have the choice of whether to receive their collection and recycling services from ELA or from Asofta.

ELA Recycling Corporation is a private non-profit organization owned by Israel’s beverage manufacturers. Its goal is to promote, coordinate and fund selective collection, sorting and recycling of bottles and beverage containers as per law in Israel.
Asofta Recycling Corporation is a private company founded in 2002 that represents more than 120 Israeli beverage importers and producers. It is responsible for fulfilling the beverage companies’ obligations for reporting, collecting, and recycling their products under the Deposit Law.

**System finance:**
Material revenues, unredeemed deposits

### REDEMPTION SYSTEM

**Return-to-Retail/Depot:**
Supermarkets and grocery retailers are required to collect empties from consumers (limited to 50/day). Containers can also be returned to around 80 recycling stations (depots). Containers are collected mostly manually from bars, restaurants, parks and redemption points (there are only a few RVMs).

**Recycling stations:**
Supermarkets and shops are obligated to take back up to 50 containers per person, per day

**Material owner:**
ELA Recycling Corporation and Asofta Recycling Corporation

LEGISLATIVE FRAMEWORK

**Mandate:** Packaging Law, Deposit System Operation Regulations

**Enacted:** 2019

**Implemented:** 2022

**Authority:** Ministry of Environmental Protection and Regional Development

**Targets:** The legislation sets both material-specific and overall targets specific to the deposit system, which are set to increase until 2030.

**Targets from 1 January 2028 to 31 December 2029:**
- **Collection:** glass (85%), plastic (85%), metal (75%), aluminum (55%),
- **Recycling:** glass (73%), plastic (58%), metal (75%), aluminum (55%), overall (68%)
- **Reuse:** glass (12%)

**Targets from 1 January 2024 to 31 December 2024:**
- **Collection:** glass (77%), plastic (77%), metal (70%), aluminum (50%),
- **Recycling:** glass (70%), plastic (55%), metal (70%), aluminum (50%), overall (65%)
- **Reuse:** glass (7%)

**Targets from 1 January 2025 to 31 December 2025:**
- **Collection:** glass (81%), plastic (80%), metal (72%), aluminum (52%),
- **Recycling:** glass (71%), plastic (57%), metal (72%), aluminum (52%), overall (66%)
- **Reuse:** glass (10%)

**Targets from 1 January 2028 to 31 December 2029:**
- **Collection:** glass (85%), plastic (85%), metal (75%), aluminum (55%),
- **Recycling:** glass (73%), plastic (58%), metal (75%), aluminum (55%), overall (68%)
- **Reuse:** glass (12%)

**Targets from 2030:**
- **Collection:** glass (90%), plastic (90%), metal (80%), aluminum (60%),
- **Recycling:** glass (75%), plastic (60%), metal (80%), aluminum (60%), overall (70%)
- **Reuse:** glass (15%)

PROGRAM SCOPE

**Material:** Plastic (predominantly pet), metal, (aluminum/tinplate), glass

**Beverage type:** Plastic and glass containers 100 ml to 3 L (0.026 to 0.79 gal), aluminum containers 200 ml to 1 L (0.05 to 0.26 gal): Carbonated and non-alcohol beverages such as water, mineral water, lemonade, energy drinks, iced teas, juices, nectars, beer, mixer products with an alcohol content up to 6%.

**Excluded:** Wine, hard liquor, dairy products, glass jars, Tetra Pak

---

1 Note: Further details to be finalized and adopted by Latvia’s Cabinet of the Ministers at a later date.
DEPOSITS AND FEES

Deposit initiator: Producer/Importer
Deposit value: € 0.10
Unredeemed deposits: System operator

Handling fees: TBD

SYSTEM OPERATOR

Clearing system: Centralized

System operator & administrator: TBD – The law defines only one operator, which will be registered as a public service provider

System finance: Unredeemed deposits, material revenues, producer fees

REDEMPTION SYSTEM

Return-to-Retailer:
Sellers of eligible beverages are required to take back empty containers in or near the premises (max. 150 m) if their sales area is at least 300 m² in the cities or 60 m² in the countryside. Local government may re-define the obligation in certain cases.

Material owner: System operator

SYSTEM RESULTS

MONEY MATERIAL FLOW

Not available
DEPOSITS AND FEES

 Deposit initiator: Producer/Distributor/Importer

 Deposit value: €0.10 (USD$0.11)

 Unredeemed deposits: System operator

 Handling fees: €4.00/1000 containers (USD$4.53)

 LEGISLATIVE FRAMEWORK

 Mandate: Beverage Container Recycling Regulations (Legal Notice 311 of 2020) made under the Environment Protection Act

 Enacted: 2020

 Implemented: Planned for Q1 2022

 Authority: Ministry for the Environment, Sustainable Development and Climate Change

 Targets: 70% collection target for 2021; 70% for 2022; 80% for 2023, 85% for 2024; 90% for 2025

 PROGRAM SCOPE

 Material: Plastic (PET), glass, metal (steel or aluminum)

 Beverage type:
 Containers 0.1 L (0.26 gal) to 3 L (0.79 gal):
 Water and flavoured water, soft drinks (carbonated and non-carbonated), ciders, beers, and other malt beverages, ready-to-drink coffee, flavoured alcohol beverages with an alcohol content not exceeding 5%, dilutables

 Excluded:
 Dairy products, cartons, foil pouches, HDPE containers, composite materials

 Note: In Budget 2015, the Government of Malta highlighted its intention to introduce a deposit return scheme. Subsequently, at the EU “Our Oceans” Conference in 2017, Malta committed to introducing a deposit scheme which was reflected in Budget Speech 2018. Government announced that the scheme would be in place in 2019, which did not occur. On 31 July 2020, the legal notice setting the path for the establishment of a DRS, which is intended to be led and managed by the private sector, was published. No further details are available at this time.
SYSTEM OPERATOR

Clearing system:
TBD

System operator & administrator:
TBD – An operator licensed by the Resource, Recovery and Recycling Agency (RRRA) will be tasked with establishing and operating the scheme

System finance:
Unredeemed deposits, administration fees, material revenues, government contributions

REDEMPTION SYSTEM

Return-to-retail:
The proposal is to exempt retailers < 150 m², but to give them the choice to opt in. It is envisaged that there will be a minimum of 350 RVMs.

Material owner:
System operator

LEGISLATIVE FRAMEWORK

**Mandate:**
Law n.º 69/2018 (System to Encourage the Return and Deposit of Beverage Containers in Plastic, Glass, Ferrous Metals, and Aluminum)

**Enacted:**
2018

**Implemented:**
TBD (Scheduled for January 2022 – delay expected to 2023)

**Authority:**
Ministry of Environment and Energy Transition

**Note:** In January 2019, the Portuguese government announced that from January 1, 2022, a deposit return system for plastic, glass, ferrous and aluminum beverage containers would become mandatory. No further details have been announced.

DEPOSITS AND FEES

**Deposit initiator:**
TBD

**Deposit value:**
TBD

**Unredeemed deposits:**
TBD

**Handling fees:**
TBD

PROGRAM SCOPE

**Material:**
Plastic, glass, metal (ferrous metal, aluminum)

**Beverage type:**
TBD

**Excluded:**
TBD

PORTUGAL

Population: 10.2 m

SYSTEM OPERATOR

Clearing system:
TBD

System operator & administrator:
TBD

REDEMPTION SYSTEM

Redemption system:
TBD

Material owner:
TBD

SYSTEM RESULTS

Not available

MONEY MATERIAL FLOW

Not available
DEPOSITS AND FEES

Deposit initiator:
Producer/Importer

Deposit value:
£ 0.20 (USD$ 0.23)

Unredeemed deposits:
System operator

Handling fees:
TBD – Will be agreed by retailers and producers, likely through a scheme administrator

LEGISLATIVE FRAMEWORK

Mandate:
The Deposit and Return Scheme for Scotland Regulations

Enacted:
Legislation was passed in the Scottish Parliament in May 2020

Implemented:
Implementation is scheduled for July 2022, but parts of the Regulations will come into force earlier to enable various scheme actors to prepare for the operation of the scheme.

Authority:
Scottish Environment Protection Agency (SEPA)

Targets:
Collection targets: 70% in first 18 months, 80% in year 2, and 90% in year 3

PROGRAM SCOPE

Material:
Plastic (PET), metal (aluminum, steel), glass

Beverage type:
Containers 50 ml to 3 L (0.01 gal to 0.8 gal):
All alcohol and non-alcohol beverages

Excluded:
Mixed material pouches, cartons, HDPE containers, and cups

SCOTLAND

Population: 5.4 m
Websites: https://depositreturnscheme.zerowastescotland.org.uk/
SYSTEM OPERATOR

Clearing system:
TBD – Likely centralized

System operator & administrator:
TBD – The formation of the administrator(s) is one of the areas being considered by the Implementation Advisory Group (IAG). Anyone can apply to become a scheme administrator when the regulations have been passed. Through the IAG, producers and retailers are considering different options and structures for developing an administrator.

System finance:
Unredeemed deposits, material revenues, producer fees

REDEMPTION SYSTEM

Return-to-Retail/Return to Redemption Center:
Retailers selling any drinks in eligible containers that are taken away from their premises will automatically be required to operate a return point. A retailer could be granted an exemption if there is an alternative return point of equal convenience available nearby that has agreed to accept scheme containers on their behalf. In addition to retailers, anyone that would like to operate a return point from somewhere other than retail premises can apply to be registered as a ‘voluntary return point operator.’

Containers can be collected manually or through a RVM. It will be up to individual retailers to decide whether they wish to install a RVM or accept returns manually. Collection of containers may be done via dedicated collections or by utilizing backhauling.

LEGISLATIVE FRAMEWORK

Mandate: Act on the deposit return scheme for disposable beverage containers and on amendments to certain acts
Enacted: 2019
Implemented: Scheduled for January 2022
Authority: Environment Ministry
Target: Collection target for plastic bottles: At least 60% by the end of 2022; 77% by the end of 2024; and at least 90% from 2027.

Collection target for metal cans: At least 90% from 2025

DEPOSITS AND FEES

Deposit initiator: Producer
Deposit value:
- Plastic: € 0.12 (USD$ 0.14)
- Cans: € 0.10 (USD$ 0.11)
Unredeemed deposits:
System operator
Handling fees:
TBD

PROGRAM SCOPE

Material:
Plastic (PET), metal
Beverage type:
Carbonated and non-carbonated beverages, beer, wine
Excluded:
Spirits, oils, milk
SYSTEM OPERATOR

Clearing system:
Centralized

System operator & administrator:
TBD (Will be comprised of the producers’ associations and be supervised by the Economy Ministry, which will coordinate the activities and finance the whole system)

System finance:
Unredeemed deposits, material revenues, producer fees

REDEMPTION SYSTEM

Return to Retailer:
Stores with an area of > 300 m² will be required to take back empty containers.

Material owner:
System operator

SYSTEM RESULTS

MONEY MATERIAL FLOW
DEPOSITS AND FEES

Deposit initiator: TBD

Deposit value: TBD – Likely a flat rate between 0.25 TRY and 50 TRY (€ 0.04 – € 0.08)

Unredeemed deposits: TBD – Will likely remain with system operator

LEGISLATIVE FRAMEWORK¹

Mandate: TBD
Enacted: TBD
Implemented: TBD – Scheduled for 2021, but likely postponed to 2023
Authority: Ministry of Environment and Urbanization
Targets: Collection target is 70% in Year 1, 80% in Year 2, and 90% by Year 3

PROGRAM SCOPE

Material:
Glass, aluminum, plastic (will expand to Tetra Pak and HDPE plastic in second stage of DRS)

Beverage type:
Containers 100 ml to 3 L (0.026 gal to 0.79 gal):
Tea and coffee, carbonated soft drinks, energy drinks, milk, fruit and vegetable juice, water, sports drinks, alcohol beverages

Excluded:
None

¹ Note: Draft legislation under discussion. Details to be finalized and approved by the Ministry of Environment and Urbanization.
SYSTEM OPERATOR

Clearing system:
TBD – Likely centralized

System operator & administrator:
TBD

System finance:
Unredeemed deposits, producer fees, material revenues

REDEMPTION SYSTEM

Return to Retailer:
All retailers that sell eligible beverage containers must accept empty containers back for recycling. In Year 1, all stores with sales area > 1000 m² are obligated to invest in RVMs. Retailers > 500 m² are obligated to invest in RVMs until beginning of Year 5 that DRS is in place.

Material owner:
Regional network operators

Reloop Platform

Reloop is a broad platform of like-minded interests that share a common vision for a circular economy. The founding members of the organization bring together industry, government, and non-governmental organizations to form a network for advances in policy that create enabling system conditions for circularity across the global economy. With members coming from different sectors, the platform aims to work as a catalyst in order to generate economic and environmental opportunities for all stakeholders in the value chain. This includes producers, distributors, recyclers, academia, NGOs, trade unions, green regions, or cities. Reloop is born to connect stakeholders, allow for information-sharing to inform those stakeholders, and influence decision makers to adopt policy that works towards the implementation of policies and systems that promote a circular economy.

Disclaimer

Reloop provides the information contained in this report in good faith, and every attempt has been made to ensure accuracy. However, we recognize that in a report of this breadth some errors of accuracy or omission are likely. The facts and data contained in this document are taken primarily from external sources, including publicly accessible annual reports released by program operators, stewardship agencies, or other involved entities. Other information was obtained through personal communication and e-mail correspondence. We welcome any comments, clarifications, and suggestions for improvement to hello@reloopplatform.org.

Acknowledgements

This report would not have been possible without the cooperation of numerous individuals across the world (too many to mention individually) whose work is dedicated to beverage container collection and recycling and who gave their time to provide and/or review for accuracy the information that is the basis for this Global Deposit Book. Their contributions and help is greatly appreciated.

Author’s Note

This report was prepared by the Reloop Platform and is intended to provide a comprehensive summary of over 40 different deposit-return systems (DRS) for one-way beverage containers in existence around the world.

</table>
California redemption/Refund value (CRV): Similar to beverage container deposits in other jurisdictions. See “Deposit.”

Clearing system: The entity responsible for reconciling the deposits paid/redeemed.

Consumer container fee: A per unit non-refundable fee paid at the point of purchase. In Saskatchewan (Canada), the fee is called an Environmental Handling Charge. In Yukon, it is called a Recycling Fund Fee, and in the Northwest Territories it is called a Container Handling Fee. In other jurisdictions, like British Columbia, it is called a Container Recycling Fee. Unlike the others which are set by the government or other responsible entity, the Container Recycling Fee represents the net cost (net of unredeemed revenue) per container type.

Deposit: A sum of money that is charged on applicable beverage containers at the point of purchase, which retailers are required to collect from consumers. Intended to act as an incentive to recycle, deposits refunded when the consumer returns the empty container to an authorized redemption center or retailer for recycling.

Deposit initiator: The first agent (i.e. producer, bottler, distributor, importer) to collect the deposit on a beverage container sold in the jurisdiction.

Handling fee: A fee that is paid to redemption centers and retailers as compensation for receiving, paying out refunds for, sorting, and storing redeemed beverage containers. On a long-term basis, handling fees also cover expenses related to investments in reverse vending machines, electricity costs, space requirements, and additional personnel required to handle the containers. The fee is often paid by the bottler or distributor, but in some cases is paid by the state (e.g. California).

HDPE: High density polyethylene (plastic)

Material owner: The owner of the recyclable commodity (empty containers) that can sell the material to the market or keep the material to have it converted into raw material for new bottles or cans.

PET: Polyethylene terephthalate (plastic)

Processing fee: Per unit fee paid by beverage manufacturers to system operator

Processing payment: The fee offered to processors in Canada to sort and market beverage containers. It is paid on a per unit basis.

Processor: Entities that provide services that may include counting, weighing, and measuring, of empty beverage containers. They may be responsible for scrap buying/selling, overseas shipping and brokering, as well as materials transformation.

Producer: Brand owner, manufacturer or distributor of beverages. Produces beverages and places the products for sale on the market. Producers sell their products to retailers, who sell them to consumers.
**Producer (administration) fee**: Producer or administration fee. Also known as an extended producer responsibility (EPR) fee, this is a fee paid by beverage producers/importers/distributors to the DRS operator to cover the proportion of system costs not covered by material revenues and/or unredeemed deposits. Although different terms may be used in different jurisdictions, they all represent the same thing.

**Redemption center (depot)**: A dedicated establishment for the collection of empty beverage containers in exchange for a deposit refund. These centers are typically situated in retail parking lots or warehouses on the outskirts of a town or city.

**Retailer**: Party that buys beverages from producers and sells them to consumers through a licensed establishment. In some DRSs, they are also responsible for accepting empty beverage containers from consumers and paying out deposit refunds.

**Return-to-redemption center (depots)**: A DRS model in which consumers return empty beverage containers for recycling to privately-owned businesses established solely for this purpose.

**Return-to-retail**: One approach to DRS, where retailers selling beverages become legally responsible for accepting empty containers for recycling. Depending on the legislation, only stores of a certain size are required to participate, such as in Lithuania, while smaller stores may opt-out. This model is considered best-in-class as it is most convenient for consumers and also offers benefits for retailers through increased foot traffic, economic incentives, and an improved corporate image. Return-to-retail models are most common in Europe, but are also used in some North American DRSs.

**Reverse vending machine (RVM)**: An automated mechanical device that accepts one or more types of empty beverage containers and issues a deposit refund. In some cases, they may also have a compaction function. Used by consumers at redemption locations.

**Unredeemed deposits**: The value of paid deposits on containers that have not been redeemed — possibly discarded in trash/as litter, recycled through other means, or lost.
