

AUTHOR'S NOTE

This report was prepared by the Reloop Platform and is intended to provide a comprehensive summary of over 40 different deposit-return systems (DRS) for one-way beverage containers in existence around the world.

Reloop Platform

Reloop is a broad platform of like-minded interests that share a common vision for a circular economy. The founding members of the organization bring together industry, government, and non-governmental organizations to form a network for advances in policy that create enabling system conditions for circularity across the global economy. With members coming from different sectors, the platform aims to work as a catalyst in order to generate economic and environmental opportunities for all stakeholders in the value chain. This includes producers, distributors, recyclers, academia, NGOs, trade unions, green regions, or cities. Reloop is born to connect stakeholders, allow for information-sharing to inform those stakeholders, and influence decision makers to adopt policy that works towards the implementation of policies and systems that promote a circular economy.

Disclaimer

Reloop provides the information contained in this report in good faith, and every attempt has been made to ensure accuracy. However, we recognize that in a report of this breadth some errors of accuracy or omission are likely. The facts and data contained in this document are taken primarily from external sources, including publicly accessible annual reports released by program operators, stewardship agencies, or other involved entities. Other information was obtained through personal communication and e-mail correspondence. We welcome any comments, clarifications, and suggestions for improvement to hello@reloopplatform.org.

Acknowledgements

This report would not have been possible without the cooperation of numerous individuals across the world (too many to mention individually) whose work is dedicated to beverage container collection and recycling and who gave their time to provide and/or review for accuracy the information that is the basis for this Global Deposit Book. Their contributions and help is greatly appreciated.
